

DAVINCI HOUSE – Synthesis of Architecture and Design

DAVINCI HOUSE – this name stands for fascination in wood and glass, for living in its most free form. The constructive flexibility of this filigree architecture meets the highest design requirements.

As result of a long experience in timber framework constructions DAVINCI HOUSE combines the creativity with the advanced technical options, workmanship of the top quality with a consequent esthetically convincing shapes. Natural building materials with excellent building physical and biologic qualities, high insulation and perfected architectonic details have guaranteed the most favorable energy consumption value for many years.

DAVINCI HOUSE provides a complete service ranging from the first planning and perfect organized production to the house handover.

Our own architects, interior designers, site engineers and specialists for every handicraft guarantee a trouble-free building process.

DAVINCI HOUSES are as individual as their owners and respective plot situations.

Special highlights are DAVINCI HOUSE' fitted furniture and kitchens from our own production line. Our designer Brigitte Beier creates all the furniture. The materials, shapes and colours blend with the filigree timber frame structure and are in perfect harmony with the character of the house.

DAVINCI HOUSE offers not only exclusive living houses but also representative business buildings e.g. offices and administrative buildings, medical practices, restaurants etc. So we recently created for the ZDF broadcasting station a house for the TV show “Zwischenstopp bei Steinbrecher” directly on the runway of the Frankfurt airport.
